EDUCATION

Master of Business Analytics | Deakin University, Burwood, Melbourne | **WAM:80.69/100** *Jul 2024 - Jul 2026*

SKILLS

- **Analytics:** Excel, SQL, Python
- **BI & Visualisation:** Power BI (dashboarding, data modelling, DAX, visualization), Tableau

EXPERIENCE

Data and Reporting Officer – Part Time Role ***Jul 2024 - Current***

Insuraplex Pty Ltd Cheltenham, Melbourne

- Developed Power BI dashboards using Power Query and DAX to automate monthly KPI reporting across 15+ projects, reducing reporting effort from 10 hours to 1 hour per cycle and improving visibility for executive decision-making.
- Standardised Excel templates for cashflow, project budget tracking, forecasting and preparing claims schedules for construction managers, saving a substantial amount of time from manual effort.
- Designed and deployed a Power BI debt collection dashboard integrating multiple Excel data sources through Power Query, data modelling, and DAX measures. Automated debt prioritisation and performance tracking, enabling collection officers to focus on high-risk accounts and improving debt recovery effectiveness.
- Partnered with Contract Managers and developers throughout the system development lifecycle, gathering requirements, validating functionality, and driving user adoption of an internal management platform.

Data Content Creator - Data & Analytics Education | Self-initiated ***Jun 2025 – Current***

Self-Initiated Balaclava, Melbourne

- Simplified SQL and analytics concepts through educational content for technical and non-technical audiences.
- Built an engaged audience of 800+ learners across YouTube, TikTok, and Instagram.

Data Project Assistant – 12 months Contract Role ***Dec 2025 – Sep 2026***

Deakin University Burwood, Melbourne

- Delivered alumni cohort insights from LinkedIn data extracts across 13 marketing and 2 Research divisions, supporting evidence-based marketing decisions.
- Executed end-to-end data pipeline including data cleaning, mapping, transformation and analysis, producing validated master datasets with built-in data quality checks to ensure accuracy and consistency across reporting outputs.
- Presented insights to stakeholders across in-person and online sessions across different departments in the university, translating complex data into clear, structured reports.
- Liaised with cross-functional stakeholders to clarify reporting requirements and ensure outputs met agreed standards, timelines, and data governance and reporting standards.

ACHIEVEMENTS

- **Deakin SHS Award (2025)** - Recognised for leadership, outstanding student contribution and community impact by Deakin University
- **GovHack Winner - Victoria (2025)** - Developed data-driven solution for housing and infrastructure planning based on increasing population for Victorian Government using public dataset

PUBLICATIONS

Dermatological Diseases Classification using Image Processing and Deep Neural Network (2020)

- Developed a machine learning model using CNN to classify various skin diseases with just a click from phone maintaining 76.3% classification accuracy on the Dermnet dataset; published in IEEE Xplore and presented at ICCCIS 2019
